

# G&G Controls

## Telemetry

Telemetry is remote monitoring alerts for pump panels.

### Power

The same Telemetry panel can take either 230V or 400V (with no neutral required).  
Single pump or dual pump, wastewater.

### Connectivity

Connect using Wi-Fi, broadband cable or SIM card.  
Telemetry can send email or text alerts to an unlimited number of contacts.  
Add/amend contacts remotely at any time.

### Cost

£799 + £11.50 delivery + VAT.  
No monthly subscription (SIM card incurs extra costs, if required).

### Improved Control

Overload reset buttons included as standard.  
Enhanced pump management, eg. when pump 1 is turned to 'off' then pump 2 stays as the duty pump.

### Notifications

Pump 1 trip, pump 2 trip and high level alarm notifications come enabled on all panels

### Components

All the components used in a Telemetry panel are industrial grade such as Schneider enclosure, contactors and overloads, Socomec isolator, Wago terminals, volt free contacts, no Dold stepping relay.

### Size

The enclosure is mild steel by Schneider, 500mm high, 400mm wide and 200mm deep for a dual pump DOL, with a door interlocked isolator.

### Lead Time

10 working days
